- Family-owned online shopping retail store on Poshmark.
- Gained experience in packing, shipping, stocking, shelving, handling online orders
- Developed good communication skills and customer service skills

## PROJECTS

### Taxi Cab Analysis | Python/[GitHub](#)

Conducted comprehensive data analysis comparing the financial performance of two distinct cab companies, enabling investors to make investment decisions in pursuit of maximum profitability. Utilized Python libraries to illustrate trends and to reorganize datasets to be used in analysis.

### Airline Reservation System | SQL/[GitHub](#)

Designed and developed an Airline Reservation System using SQL, enabling efficient booking, modification, and cancellation of flight reservations. Collaborated with a partner to gather feedback and deliver a robust system that showcases expertise in SQL and database management.

### Exploring Early COVID-19 Data | SQL/[GitHub](#)

SQL project that delves into a comprehensive dataset of COVID-19 records from the initial stages of the pandemic. Using SQL queries, the project uncovers significant insights into the virus's spread, its impact on public health, and the consequential changes in different regions worldwide.

## SKILLS

- **Languages:** Python (Matplotlib, Seaborn, Sklearn, Tensorflow), SQL, Java, C++, Flask
- **Analysis Techniques:** Logistic Regressions, Decision Trees, Hypothesis Testing
- **Tools:** Git, Kaggle, Jupyter, VSCode, SPSS, Tableau, Excel, Power BI
